### SUMMARY

MERN Stack Developer passionate about building efficient web applications and solving real-world problems using JavaScript, Node.js, and React. Eager to contribute to dynamic projects, enhance my skills, and grow in the tech industry.

### PROFESSIONAL EXPERIENCE

#### Full-Stack Developer

##### Loanyfy— May 2025 - Present

- Spearheaded development of customer-facing and internal **CRM-based loan management** systems.
- Built scalable **B2B CRM platforms** for lead tracking, sales pipeline, and client lifecycle management.
- Developed real-time **dashboards** with filters and analytics for internal teams.
- Deployed secure **SaaS modules** for services like loan transfer, LAP, and overdraft.
- Integrated responsive **web interfaces** to streamline loan workflows and improve business operations.

##### A2fintech— July 2024 - May 2025

- Developed and maintained the company website and **HR portal** using the MERN Stack.
- Built core **HR features** like attendance tracking, leave requests, and employee onboarding.
- Ensured **smooth performance, responsiveness, and cross-device compatibility** of the website and internal tools.

### TECHNICAL SKILLS

Languages:	HTML, CSS, JavaScript, SQL
Frameworks & Libraries:	Node.js, Express.js, React
Databases:	MySQL, MongoDB
Development Tools:	Git, GitHub, Postman, VS Code
Hosting & Deployment:	Vercel, Render, hostiger
Additional Knowledge:	Basic Data Structures & Algorithms, Object-Oriented Programming (OOP)

### EDUCATION

United Institute of Technology	September 2020 – June 2024
Bachelor of Technology (B. Tech) in Computer Science & Engineering	Prayagraj, U.P
Sanskar public school	April 2018 – March 2020
Senior School (12th) - Central Board of Secondary Education	Prayagraj, U.P.
Sanskar public school	April 2016 – March 2018
High School (10th) - Central Board of Secondary Education	Prayagraj

### PROJECTS

#### Alras Cars – Car Rental Platform | Live Demo

Tech Stack: MERN (MongoDB, Express.js, React, Node.js)

- Developed 50+ RESTful APIs for listings, bookings, user roles, and admin operations.
- Implemented secure login with email/password and social auth (Google, Facebook, Apple).
- Enabled admins to manage car listings with add, edit, and delete functionality.
- Integrated a secure payment gateway for seamless booking transactions.
- Ensured performance, scalability, and security across all backend modules.

## E-commerce Website | GitHub Repository | Live Demo

Tech Stack: MERN (MongoDB, Express.js, React, Node.js)

- Built secure login/signup system with Express.js and MongoDB for user access control.
- Developed seller-side product listing and buyer-side real-time product display.
- Designed interactive front-end with React for a seamless user experience.
- Enabled real-time product updates and dynamic UI rendering.
- Ensured smooth integration between front-end and back-end services.

## Employee Management System | GitHub Repository | Live Demo

Tech Stack: MERN (MongoDB, Express.js, React, Node.js)

- Developed a complete HRMS with attendance, salary, and performance tracking features.
- Implemented role-based access control with separate dashboards for HR and employees.
- Designed user-friendly UI for leave requests, attendance marking, and employee updates.
- Streamlined internal operations by automating key HR workflows.
- Ensured a responsive, secure, and scalable web-based HR portal.

## Hobbies

---

- Computer Programming: Passionate about coding and continuously learning new technologies to improve my skills
- Exploring Gadgets: Keen interest in discovering and understanding the latest tech innovations and devices.
- Photography: Enjoy capturing moments and experimenting with creative compositions through the camera lens.
